We raise the similar,
and revolutionize
exclusivity

We're Concepta Ingredients!

For over 30 years, we have been bringing innovation and sustainability to the world's most diverse and demanding markets. We produce unique ingredients from Brazilian biodiversity, with the highest quality and the latest in industrial technology. Our portfolio includes more than 50 natural, organic, sustainable and traceable products.

Sustainable from the beginning

Sourcing ingredients from Brazil's biodiversity is a matter of social and environmental responsibility, which we embody in the **Bio Abundance Program**. Our production chains cover four Brazilian biomes and directly benefit 6,500 families, as well as contributing to the conservation of 580,000 hectares of native forests.

Get to know the Bio
Abundance Program

The commitment to the ESG agenda runs through all our professional activities. We are actively engaged with the UN Sustainable Development Goals (SDGs).

Find out how we are
involved with the SDGs

A woman with wet hair, wearing a light green one-piece swimsuit, is shown from the waist up. She is applying a product from a black pump bottle to her left arm. Her skin is glistening with moisture. The background is filled with large, vibrant green tropical leaves. In the top left corner, there is a small, stylized white logo consisting of three intersecting lines forming a triangular shape.

Innovation with *origination*

Concepta Beauty range, aimed at the beauty and personal care industry, offers plant-based ingredients with the hallmark of exclusivity and sustainable origins. We combine natural active ingredients from Brazilian biodiversity with high technology, generating unique, innovative and high-value solutions for your products.

Extract

Calendula Extract

*Helianthus annuus seed
oil (and) Calendula
officinalis flower extract*

Properties:

- Soothing effect
- Moisturizing
- Skin protector

Indications:
